

Yes, it's a good idea to add a WhatsApp icon to allow users to contact you directly. This can provide a quick and convenient way for users to get in touch with you. Additionally, you could also include an email contact form or phone number for users who prefer those methods of communication.

Here is a revised overview of the sections and pages for a simple static delivery web application:

1. Homepage: This page would give an introduction to your service, along with a form to calculate delivery charges.
2. Delivery Calculator: This page would have a form that takes the user's pickup and delivery location, along with the weight and dimensions of the package. It would then use the information to calculate the delivery charges.
3. Delivery Map: This page would display the delivery route on a map, along with the delivery time and cost.
4. Contact Us: This page would include a WhatsApp icon, email contact form, or phone number for users to get in touch with you.

It is important to keep the design and functionality of the website as simple and user-friendly as possible to ensure a positive user experience
